Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Election/Restrictions***

This application is filed as a divisional of serial number 08/589032, within which a restriction requirement was made and applicant elected to pursue the method claims at that time. As a divisional filing this application should be directed to the previously non-elected apparatus claims, in view of the completion of prosecution of the elected method in the parent application. Accordingly, it is held that claims 28-48, directed to that apparatus, have been constructively elected by original presentation in a divisional application for prosecution on the merits. Claims 1-27 are withdrawn from consideration as being previously prosecuted and now directed to a non-elected invention. Cancellation of such claims is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 28-30, 32-33, 37-39 and 45-48 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Cornwall U.S. patent No.'s 5,221,520 or 5,186,903.

Art Unit: 1744

Both Cornwall references teach an apparatus for treating the atmosphere by providing a substrate support have an air contacting surface, a catalytic pollutant treating material thereon, and means for passing air into contact with the pollutant treating material. The catalyst is operative at ambient room temperature, but can be heated for enhanced efficiency. See column 5, lines 35-65 and column 6, lines 59-65, column 7, lines 5-24, and column 8, lines 45-52, of '520 as exemplary).

Claims 28-32, 34 and 36-45 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by either Galligan et al., U.S. patent No.'s. 5,422,331 or 5,620,672.

Galligan et al., teach the application of a pollutant treating material to an air contact surface within an air handling system, including heat exchange means. With that application being provided on components of the system such as fan blades. See column 8 in either reference.
